

A Major technological breakthrough in the roofing industry in a more than a century with countless benefits for engineers, architects, roofers as well as the end user.

APPLICATION ADVANTAGES

VIREO™ from Bramal

- Cold applied - no heating or flames
- High speed of application (up to 1 sq.ft / sec.)
- No need to purchase any inventory or application equipment
- Multiplies yearly square footage that a roofer can do with the same installation team
- Drastic reduction of insurance and C.S.S.T costs can be expected
- No V.O.C / no smell
- No joints, no seams
- Low pressure spray application / Low atomization rate
- Low weight & flexible application hose
- Walkable and cured in about 1 hr. (weather dependant)
- Conforms to complex shapes & obstacles
- Light weight (1 - 1.5 lbs / sq.ft)
- Light in color for reflection of heat & U.V exposure
- Fully adheres to substrate (point by point)\
- Class "A" fire protection

Through research & development Bramal Inc. has brought simplicity and performance to the domain of roofing.

BRAMAL

When choosing **VIREO™**, you favour innovations and investments that translate to better performance technically, economically and environmentally.

VIREO™ The Smart choice for sustainable development

COST /
GUARANTEE

Bramal Inc's relentless commitment to the "environomic" principal guarantees an affordable, long lasting solution.

COMPETITIVE ADVANTAGES

VIREO™ from Bramal

- Comparable or lower than 80% of the competition
- Laboratory aging test determine it to be a long term, viable solution
- 10 year manufacturer warranty on materials
- Accredited by government agencies such as CNRC, CCMC 13541-R, and CRIQ attesting that VIREO™ meets or exceeds the most stringent requirements of the building code.

Independent studies conducted by CRIQ have confirmed the durability and longevity of the VIREO™ product.

BRAMAL

VIREO™ The Smart choice for sustainable development

ENVIRONEMENT

In our best interest and the interest of future generations we must move towards sustainable development and environmental stewardship.

ENVIRONMENTAL ADVANTAGES

Our product formulation is composed of 50% recycled tire material

BRAMAL

When choosing **VIREO™**, you favour innovations and investments that translate to better performance technically, economically and environmentally.

VIREO™ from Bramal

- Reduces waste tire stockpiles in landfills
- Gives new life to unused tire polymer
- Does not support the burning of tires (T.D.F's) as a fuel alternative
- Truly recycles waste tire material into a value added composite material
