

**Dear prospective Bramal LED customer,**

Ronsco Inc. recently took delivery of and installed Bramal LED's innovative LED retrofit lamps and fixtures. We chose Bramal LED from among some more established names in lighting due to their reputation for customer service and quality.

The Bramal LED products lifetime rating of 80,000 hours and the flexibility of installation were also key to our decisions, as was working with a Quebec based manufacturer.

The project we undertook was a complete update of our lighting infrastructure both internal and external. We replaced our inefficient MH High Bays with Bramal LED 6 lamp fixtures utilizing their versatile LED tubes. We expect a full payback in 3 years or less. Bramal LED was also able to source and supply us with high quality exterior lighting from one of their partners which allowed us to complete the work quickly and with no additional time spent finding products.

Working directly with Bramal LED and having the knowledge of their engineering and manufacturing teams available to us was very helpful as any question we had was quickly answered.

I would not hesitate to recommend Bramal LED as the go to company for industrial and commercial LED retrofit requirements.

Please do not hesitate to contact us directly for further feedback and if you are in the Montreal region we would be open to showing you our facility and the Bramal LED product in action.

Sincerely,

Kent Montgomery

Executive V.P. and COO

Ronsco Inc.
